

Thru-beam sensor

BB10-P-8493/25/35/103/115a

- Single-beam miniature photoelectric sensor, ideal for installing in frames or contours
- Integrated circuit
- Plug-in style housing for 13 mm hole
- Light on version

Miniature photoelectric sensor with plug-in style housing for mounting in 13 mm hole

Function

There is no simpler way of installing a sensor: drill the hole, clip in the sensor and you're done. What's more, the BB10 plug-in sensors for doors and turnstiles offer top performance at an extremely attractive price. The switching mechanism is integrated in the compact, self-contained and temperature-stable housing, making the BB10 suitable even for extremely cold regions with temperatures as low as -40°C.

Application

- Monitoring function for turnstiles
- Activation function for restarting escalators
- Monitoring of industrial gates
- Person detection for automatic doors and gates

Technical Data

| | | | |
|---|----------------|--|--|
| System components | | | |
| Emitter | | BB10-T-F1-8493/115a | |
| Receiver | | BB10-R-F1-8493/25/35/103/115a | |
| General specifications | | | |
| Effective detection range | | 0 ... 2 m | |
| Threshold detection range | | 2.5 m | |
| Light source | | IRED | |
| Light type | | modulated infrared light , 880 nm | |
| Diameter of the light spot | | approx. 250 mm at a distance of 2 m | |
| Opening angle | | Emitter: +/- 3 ° Receiver: +/- 10 ° at max. sensing range ; typical | |
| Optical face | | frontal | |
| Ambient light limit | | halogen light 100000 Lux ; according to EN 60947-5-2 | |
| Functional safety related parameters | | | |
| MTTF _d | | 795 a | |
| Mission Time (T _M) | | 20 a | |
| Diagnostic Coverage (DC) | | 0 % | |
| Indicators/operating means | | | |
| Function indicator | | LED red: lights up when receiving the light beam ; flashes when falling short of the operating reserve; OFF when light beam is interrupted | |
| Electrical specifications | | | |
| Operating voltage | U _B | 10 ... 30 V DC | |
| No-load supply current | I ₀ | Emitter: ≤ 20 mA Receiver: ≤ 10 mA | |
| Output | | | |
| Switching type | | light-on | |
| Signal output | | 1 PNP output, short-circuit protected, reverse polarity protected, open collector | |
| Switching voltage | | max. 30 V DC | |
| Switching current | | max. 100 mA | |
| Voltage drop | U _d | ≤ 1.5 V DC | |
| Switching frequency | f | 100 Hz | |
| Response time | | 5 ms | |
| Conformity | | | |
| Product standard | | EN 60947-5-2 | |
| Approvals and certificates | | | |
| CCC approval | | CCC approval / marking not required for products rated ≤36 V | |
| Ambient conditions | | | |
| Ambient temperature | | -40 ... 60 °C (-40 ... 140 °F) , fixed -20 ... 60 °C (-4 ... 140 °F) , movable | |
| Storage temperature | | -40 ... 70 °C (-40 ... 158 °F) | |
| Relative humidity | | 90 % , noncondensing | |
| Mechanical specifications | | | |
| Degree of protection | | IP67 | |
| Connection | | 160 mm fixed cable in M8 plug Receiver: Connection line, gray ; Emitter: Connection line, black | |
| Material | | | |
| Housing | | PC , black | |
| Optical face | | Plastic pane | |
| Mass | | approx. 15 g per device | |

Connection Assignment

Characteristic Curve

Function Principle

The thru-beam sensor requires two devices for operation; an emitter and a receiver. The emitter and receiver must be optically aligned with one another in a single line. The infrared light emitted from the emitter is recorded by the receiver and evaluated. The sensor detects both people and objects for as long as an object interrupts the detection beam, regardless of movement and surface structure.

Release date: 2023-05-09 Date of issue: 2023-05-09 Filename: 70116044_eng.pdf

Additional Information

Static detection:

The sensor detects both people and objects for as long as an object interrupts the detection beam, regardless of movement and surface structure.

| | | Electronic output |
|---------------------|-------------------------------|-------------------|
| Light on /25 | Person located within beam | Inactive |
| | No people located within beam | Active |
| Dark on /59 | Person located within beam | Active |
| | No people located within beam | Inactive |

Optics:

The relatively wide opening angles allow the sensors to be mounted quickly without any alignment issues. Function is maintained even if mounting profiles are slightly distorted.

Mounting:

Thanks to its compact dimensions, the sensor fits in U profiles or behind any covers.

| Sheet thickness [mm] | Hole diameter [mm] | |
|----------------------|--------------------|------|
| | 13 | 13.5 |
| 1 | OK | X |
| 2 | OK | OK |
| 3 | OK | OK |

X = mounting not possible

OK = mounting possible

Mounting for dual-beam protection:

For dual-beam versions, 2 light sources and receivers are required.

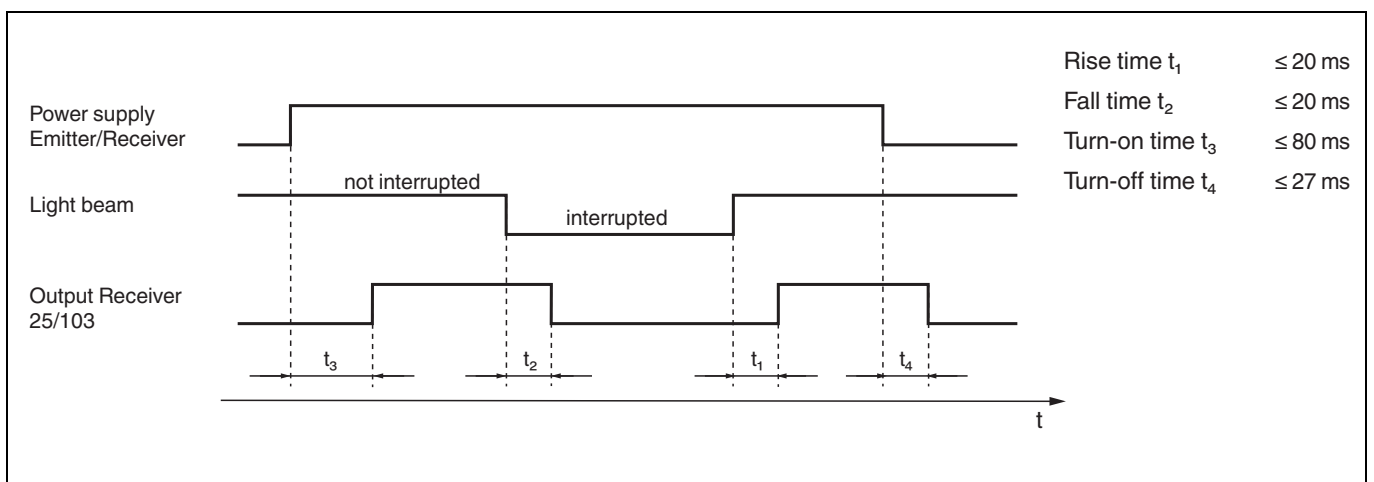

When using thru-beam sensors with 2 different transmission frequencies (F1 and F2), it is not necessary to observe a minimum beam distance between the thru-beam sensors.

When using thru-beam sensors with the same transmission frequency:

Ensure that the minimum beam distance is 20 cm and that the transmitter and receiver are arranged in a cross formation.
