

Optical data coupler LS682-DA-EN/F1/146

- Independent of Ethernet protocol
- TCP/IP, PROFINET, PROFIsafe, EtherCAT, FSoE, EtherNet/IP™, Ethernet POWERLINK etc.
- Version for low temperature applications
- Plug connection for fast mounting
- No parameterization
- Line indicator for signal strength

Optical data coupler for fast Ethernet, 150 m detection range, infrared light, 100 Mbit/s data rate, M12 plug

Function

The optical data coupler serves as a connection of Ethernet modules to remote modules. These can move along an axis toward each other. The devices are optimized for conditions in high bay warehouses bays. The physical transfer takes place protocol-free with 100 MBit/s full duplex. The data rate remains constant irrespective of distance. Telegrams are not saved, which enables immediate transfer.

General specifications

| | |
|------------------------------|---|
| Effective detection range | 0 ... 150 m |
| Threshold detection range | 180 m |
| Light source | laser diode |
| Light type | modulated infrared light |
| Laser nominal ratings | |
| Note | INVISIBLE LASER RADIATION , DO NOT VIEW DIRECTLY WITH OPTICAL INSTRUMENTS |
| Laser class | 1M |
| Wave length | 785 nm |
| Beam divergence | 15 mrad |
| Pulse length | 8 ns |
| Repetition rate | 62.5 MHz |
| Maximum optical power output | 60 mW |
| Diameter of the light spot | 1.5 m at a distance of 100 m |
| Opening angle | 1 ° |
| Ambient light limit | > 10000 Lux |

Functional safety related parameters

Laser Class 1M Information

- The irradiation can lead to irritation especially in a dark environment. Do not point at people!
- Caution: laser light, do not observe laser light with optical instruments such as magnifying glasses, microscopes, telescopes or binoculars.
- Maintenance and repairs should only be carried out by authorized service personnel!
- Attach the device so that the warning is clearly visible and readable.
- Caution – Use of controls or adjustments or performance of procedures other than those specified herein may result in hazardous radiation exposure.

Additional Information

Product Description

The LS682-DA-EN is a device for serial data transfer in Ethernet systems. One F1 and one F2 device is needed for each data transfer link.

Data is transferred in both directions simultaneously by means of modulated light.

Function Displays/Excess Gain

A red alignment LED, which can be seen from a long way off, is located on the front of the device to serve as an alignment aid. As soon as a receiver detects the emitted light of the device opposite it, the flashing frequency of the alignment aid decreases. If the light goes out, this indicates that the devices are aligned with sufficient excess gain. For fine adjustment, the optical data coupler features a bar graph display (signal display) for optimum alignment.

| | | | |
|----------------|-------------|-----------------------------------|--|
| Signal display | Red area | Yellow area (at least one LED) | Green area (at least one LED) |
| Status | Weak signal | Sufficient excess gain | Signal with excess gain weak signal output active |
| Transmission | Blocked | Released | Transmission with excess gain |

Mounting

The device is mounted using appropriate accessories, e.g., OMH-LS610-01 for wall mounting.

The x-y adjuster is delivered preassembled. It is fixed in the required beam direction ($\pm 90^\circ$ rotation possible) on the mounting bracket.
