

Ultrasonic sensor

UC500-18GS-2EP-IO-V15

- IO-Link Interface for process data, parameterization and diagnosis
- Programmable via DTM with PACTWARE
- Programmable via IrDA (infrared interface)
- Selectable sound lobe width
- Synchronization options
- Enhanced temperature compensation adjustable, stable measuring values already 2 min after switching on
- 2 Push-pull outputs

Single head system

Function

The UC*-18GS*IO* series ultrasonic sensor combines versatility with a compact housing. All functions can be conveniently parameterized via IO-Link or IrDa interface.

A precise interference suppression and the adjustable sound beam width allow an optimal adaptation to your application. The output configuration as well as the sound beam width can also be set directly on the sensor via programming buttons. Process and service data can be transmitted via IO-Link, allowing easy integration into Industry 4.0 applications.

General specifications

Sensing range	30 ... 500 mm
Adjustment range	50 ... 500 mm
Dead band	0 ... 30 mm
Standard target plate	100 mm x 100 mm
Transducer frequency	approx. 300 kHz
Response delay	minimum : 20 ms factory setting: 40 ms
Sensor cycle time	≥ 10 ms (factory setting) ; programmable to 60 s

Function

Adjustment possibilities

The sensor features 2 switching outputs with each 2 programmable switch points. Programming the switch points, the output mode, the output logic and the beam width can be done in two different ways:

- Using the sensor's programming buttons
- Using the IO-link interface of the sensor. This method requires an IO-link master (e.g. IO-link-Master02-USB) and the associated software. The download link is available on the product page for the sensor at www.pepperl-fuchs.com.

Synchronization

The sensor features a synchronization input for suppressing ultrasonic mutual interference („cross talk“).

The following synchronization modes are available:

1. Automatic multiplex mode.
2. Automatic common mode
3. Externally controlled synchronization

Further Documentation

- For information on programming via programming buttons and synchronisation you may refer to the commissioning instruction.
- For detailed information on application and programming via IO-Link we provide a manual.
