

Model Number

MPZB14

Ball and Swivel Vertical Mounting
Bracket and Plate

Features

- Mounting bracket

Technical data

Standard conformity

Standards EN 60947-5-2

Suitable series

Series MP Series

Note

Swivel Mounting Brackets

The basic ball and swivel mounting bracket (360° swivel, 10° tilt) consists of two plastic brackets and the spherical plastic swivel nut. The swivel nut has M30 threading for direct installation of the MPT (mini MP base), including the quick disconnect versions. The bracket (MPZB06) can be directly mounted to a surface, or the MPZB07 mounting plate may be used. The MPZB08 adapter allows you to connect the ball and swivel bracket to the MP relay (MPV) and MP plug-in bases (MPS).
