

2-D LiDAR Sensor OBD30M-R2000-1L-Y70112344

- 4 freely programmable monitoring fields
- 4 inputs/outputs (selectable)
- High operating range
- 360°-angle of measurement
- Measuring method PRT (Pulse Ranging Technology)
- Very narrow scan plane

R2000 Detection, 2-D LiDAR sensor for precise field monitoring, measuring range to object up to 30 m

Function

Based on Pulse Ranging Technology (PRT), the sensor is powerful for measurements with a long range and a small light spot. The device scans its environment over the complete measuring angle of 360°. Due to the high scanning frequency, this sensor type is suitable for advanced applications. The device meets laser class 1 and is eye safe. Additional precautions to protect the operating personnel are not required. The interactive all-round display integrated in the optical surface can freely display individual texts and graphics. A wide range of accessories enables the sensor to be used in different applications. A PACTware device type manager (DTM) specially developed for this series offers extensive configuration and diagnostic options.
