Barcode scanner

Function

The barcode scanner is a line scanner for 1D barcodes. With its high-performance optics and code reconstruction, the scanner offers a high level of reliability in reading difficult-to-detect 1D barcodes. A function key and several LEDs on the barcode scanner provide support when parameterizing, teaching in barcodes, and testing. In live operation, the LEDs provide information about the relevant read status. The corresponding PC software makes parameterization simple.
