## **Model Number**

### RL61-55-Z/115/127

Retroreflective sensor with fixed cable

### **Features**

- Cost-optimized series for standard • tasks in a special design
- Compact design
- Wide range of mounting options • thanks to cubic housing design with M30 thread
- 360° high visibility LEDs
- Programmable ON-delay, OFF-delay, and One-shot timers

# **Product information**

The Series 61 sensor family is a comprehensive product line, offering five sensing modes. Each sensor is equipped with four LEDs that are highly visible from all directions, indicating Power-On, target presence and marginal excess gain. The widely recognized, polycarbonate housing provides a IP67 protection degree rating. Color-coded labels are clearly printed on the housing to easily identify the sensing mode. DC models offer a 4-in-1 output while AC/DC models have a SPDT relay output rated to 3 A. All versions come standard with an integral multifunction timer, sensitivity adjustment and Light-ON/Dark-ON switch. Series 61 sensors are cross-talk protected and have a high degree of resistance to ambient lighting. Each sensor can be mounted via front and rear slots, rear dovetail guide or M30 x 1.5 mounting base. Additionally, cabled sensor models provide 1/2" - 14 NPT internal threads for use with flexible conduit.

## **Electrical connection**

C

## Indicators/operating means

1	Operating display	green		
2	Signal display	yellow		
3	Sensing range adjuster			
4	Time adjuster			
5	DIP-switches

# **Technical data**

Technical data		
General specifications		
Effective detection range		0 18 m
Reflector distance		0.3 18 m
Threshold detection range		25 m
Reference target		FE-RR1 reflector
Light source		LED
Light type		modulated visible red light , 630 nm
Polarization filter		yes
Diameter of the light spot Angle of divergence		approx. 350 mm at a distance of 18 m 1.1 °
Ambient light limit		5000 Lux ; according EN 60947-5-2
Indicators/operating means		
Operation indicator		2 LEDs green
Function indicator		2 LEDs yellow
		on: reflector inside the sensing range off: reflector outside the sensing range
Control elements		Light/Dark switch
Control elements		Detection range adjuster
Control elements		Time adjuster ( 0 50 ms )
Electrical specifications		10 30 V DC
Operating voltage Ripple	U <sub>B</sub>	10 %
No-load supply current	I <sub>0</sub>	≤ 35 mA
Protection class	0	II, rated voltage $\leq 250$ V AC with pollution degree 1-2 according
		to IEC 60664-1 Output circuit basis insulation of input circuit according to EN 50178, rated insulation voltage 240 V AC
Output		P 1.71 1 9 1 1 1
Switching type		light/dark on, switchable
Signal output		2 NPN complementary, short-circuit protected, reverse polarity protected
Switching voltage		max. 30 V DC max. 100 mA
Switching current Voltage drop	Ud	≤2.5 V
Switching frequency	f d	500 Hz
Response time	•	≤1 ms
Timer function		DIP-switch for selection of operating modes
Ambient conditions		
Ambient temperature		-40 55 °C (-40 131 °F)
Storage temperature		-40 70 °C (-40 158 °F)
Mechanical specifications		
Degree of protection		IP67
Connection		2 m fixed cable
Material		
Housing		PC (Polycarbonate)
Optical face		PMMA
Mass	_	150 g
Tightening torque, fastening screw		≤2 Nm
Compliance with standards and o ves	airecti-	
Standard conformity		
Product standard		EN 60947-5-2:2007 IEC 60947-5-2:2007
Approvals and certificates		
UL approval		
CCC approval		CCC approval / marking not required for products rated ≤36 V
		cULus CCC approval / marking not required for products rated ≤36 V

**PEPPERL+FUCHS** 

Adjustment Instructions

### Intended use:

The retroreflective sensor contains the emitter and receiver in a single housing. The light from transmitter is reflected back from a reflector to the receiver. If an object interrupts the light beam, the switching function is initiated.

### Mounting instructions:

The sensor can be mounted using the through-holes or with a mounting bracket (not included with delivery).

The base surface must be flat to avoid distorting the sensor housing during mounting. It is advisable to secure the bolts and screws with washers so that the sensor does not become misaligned.

### **Adjustment Instructions:**

Connect the sensor to operating voltage and the green LED lights up solid.

Mount a suitable reflector opposite the sensor and make a rough adjustment.

The precise adjustment is done by swiveling the sensor horizontally and vertically. With optimum light reception, the yellow LED lights up solid. It will blink if the sensor requires fine adjustment.

### **Object detection:**

Move an object into the light beam. If the object is detected, the yellow LED switches off. If it does not switch off, reduce the sensitivity with the potentiometer until it does. It should light up solid when the object is removed.

#### **Cleaning:**

The yellow LED flashes if the light received decreases (e.g. dirty lenses).

We recommend that you clean the optical interfaces and check all connections at regular intervals.
