#### **Dimensions**

## **Model Number**

#### OBR2000-R2-E0-L

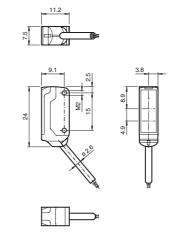

Laser retroreflective sensor with 2 m fixed cable

#### **Features**

- Ultra-small housing design
- DuraBeam Laser Sensors durable ٠ and employable like an LED
- 45° cable outlet for maximum ٠ mounting freedom under extremely tight space constraints
- Improvement in machine availability ٠ with abrasion-resistant, antistatic glass front

#### **Product information**

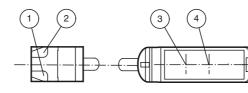

The nano sensor has been developed for a broad range of applications. It offers excellent durability and is exceptionally easy to install. The housing is compact and, with its  $45^\circ$ cable outlet, can be installed in the smallest spaces. New functional principles and functionality open up a range of new options. The abrasion-resistant lens allows long operating times close to the moving object.

# Laser notice laser class 1

- The irradiation can lead to irritation especially in a dark environment. Do not point at people!
- Maintenance and repairs should only be carried out by authorized service personnel!
- Attach the device so that the warning is clearly visible and readable. ٠
- The warning accompanies the device and should be attached in immediate proximity to the device. ٠
- Caution - Use of controls or adjustments or performance of procedures other than those specified herein may result in hazardous radiation exposure.
